Human Cytomegalovirus: 325 (Current Topics in Microbiology and Immunology) Thomas E. Shenk, Mark F. Stinski

This volume has gathered some of the experts in the field to review aspects of our understanding of CMV and to offer perspectives of the current problems associated with CMV. The editors and authors hope that the chapters will lead to a better understanding of the virus that will assist in the development of new and unique antivirals, a protective vaccine, and a full understanding of CMV's involvement in human disease.
