Cracking the SAT II, Chemistry (SAT II Guides) Theodore Silver, Princeton Review

WE KNOW THE SAT II: CHEMISTRY

The experts at The Princeton Review study the SAT II: Chemistry and other standardized tests each year to make sure you get the most up-to-date, thoroughly researched books possible.

WE KNOW STUDENTS

Each year we help more than two million students score high with our courses, bestselling books, and award-winning software:

WE GET RESULTS

Students who take our courses for the SAT, ACT, and many other tests see score improvements that have been verified by independent accounting firms. The proven techniques we teach in our courses are in this book.

AND IF IT'S ON THE SAT II: CHEMISTRY EXAM, IT'S IN THIS BOOK

We don't try to teach you everything there is to know about chemistry--only the techniques you'll need to know to score high on the SAT II exam. There's a big difference. In *Cracking the SAT II: Chemistry, 1999-2000 Edition*, you will learn to think like the test makers and:

- *Eliminate answer choices that look right but are planted to fool you
- *Improve your score by knowing in advance what chemistry topics are likely to be tested
- *Use the "divide and conquer" method to solve complicated problems
- *Gain invaluable test-taking experience with our practice questions in every chapter

Practice your skills on the full-length sample tests inside. The questions are just like the ones you'll see on the actual SAT II: Chemistry exam, and we fully explain every solution.
