The Metrics of Science and Technology Eliezer Geisler

Dr. Geisler's far-reaching, unique book provides an encyclopedic compilation of the key metrics to measure and evaluate the impact of science and technology on academia, industry, and government. Focusing on such items as economic measures, patents, peer review, and other criteria, and supported by an extensive review of the literature, Dr. Geisler gives a thorough analysis of the strengths and weaknesses inherent in metric design, and in the use of the specific metrics he cites. His book has already received prepublication attention, and will prove especially valuable for academics in technology management, engineering, and science policy; industrial R&D executives and policymakers; government science and technology policymakers; and scientists and managers in government research and technology institutions.

Geisler maintains that the application of metrics to evaluate science and technology at all levels illustrates the variety of tools we currently possess. Each metric has its own unique strengths and weaknesses, but overall, metrics offer the best possible way to evaluate science and technology. He then finds that in general, science and technology have a positive effect on the human experience. Truly state of the art in the study of the metrics of science and technology, their outcomes and contributions to society and the economy, the book provides unique analyses of the academic world and its most useful metrics: the industrial science/technology research and development complex, and the government network of laboratories. For each, Geisler gives a comprehensive analysis of the main metrics and their best applications. His book is thus also usable in certain advanced undergraduate and graduate courses and seminars that treat technology and engineering management, project management in technology industries, and the evaluation of social and economic programs.

From reader reviews:

Patricia Rodrigue:

In other case, little individuals like to read book The Metrics of Science and Technology. You can choose the best book if you appreciate reading a book. So long as we know about how is important some sort of book The Metrics of Science and Technology. You can add understanding and of course you can around the world by just a book. Absolutely right, mainly because from book you can realize everything! From your country until finally foreign or abroad you can be known. About simple matter until wonderful thing you could know that. In this era, we can easily open a book or maybe searching by internet device. It is called e-book. You can utilize it when you feel uninterested to go to the library. Let's study.

Juan McCain:

Book is written, printed, or illustrated for everything. You can realize everything you want by a reserve. Book has a different type. As we know that book is important thing to bring us around the world. Adjacent to that you can your reading talent was fluently. A e-book The Metrics of Science and Technology will make you to always be smarter. You can feel considerably more confidence if you can know about almost everything. But some of you think this open or reading a book make you bored. It is not make you fun. Why they might be thought like that? Have you in search of best book or appropriate book with you?

Mathew Jones:

Do you one of people who can't read enjoyable if the sentence chained from the straightway, hold on guys this particular aren't like that. This The Metrics of Science and Technology book is readable simply by you who hate the perfect word style. You will find the details here are arrange for enjoyable studying experience without leaving possibly decrease the knowledge that want to offer to you. The writer connected with The Metrics of Science and Technology content conveys the idea easily to understand by many people. The printed and e-book are not different in the articles but it just different in the form of it. So , do you even now thinking The Metrics of Science and Technology is not loveable to be your top list reading book?

Joel Padilla:

Your reading sixth sense will not betray anyone, why because this The Metrics of Science and Technology book written by well-known writer who really knows well how to make book which can be understand by anyone who else read the book. Written within good manner for you, dripping every ideas and producing skill only for eliminate your own personal hunger then you still skepticism The Metrics of Science and Technology as good book not simply by the cover but also by content. This is one e-book that can break don't ascertain book by its include, so do you still needing a different sixth sense to pick this kind of!?! Oh come on your looking at sixth sense already said so why you have to listening to another sixth sense.
