Computational Methods for Electromagnetic Phenomena: Electrostatics in Solvation, Scattering, and Electron Transport

Wei Cai

Computational Methods for Electromagnetic Phenomena: Electrostatics in Solvation, Scattering, and Electron Transport Wei Cai

A unique and comprehensive graduate text and reference on numerical methods for electromagnetic phenomena, from atomistic to continuum scales, in biology, optical-to-micro waves, photonics, nanoelectronics and plasmas. The state-of-the-art numerical methods described include:

- Statistical fluctuation formulae for the dielectric constant
- Particle-Mesh-Ewald, Fast-Multipole-Method and image-based reaction field method for long-range interactions
- High-order singular/hypersingular (Nyström collocation/Galerkin) boundary and volume integral methods in layered media for Poisson-Boltzmann electrostatics, electromagnetic wave scattering and electron density waves in quantum dots
- Absorbing and UPML boundary conditions
- High-order hierarchical Nédélec edge elements
- High-order discontinuous Galerkin (DG) and Yee finite difference time-domain methods
- Finite element and plane wave frequency-domain methods for periodic structures
- Generalized DG beam propagation method for optical waveguides
- NEGF(Non-equilibrium Green's function) and Wigner kinetic methods for quantum transport
- High-order WENO and Godunov and central schemes for hydrodynamic transport
- Vlasov-Fokker-Planck and PIC and constrained MHD transport in plasmas

From reader reviews:

Timothy Parker:

The event that you get from Computational Methods for Electromagnetic Phenomena: Electrostatics in Solvation, Scattering, and Electron Transport could be the more deep you rooting the information that hide inside the words the more you get considering reading it. It doesn't mean that this book is hard to recognise but Computational Methods for Electromagnetic Phenomena: Electrostatics in Solvation, Scattering, and Electron Transport giving you thrill feeling of reading. The copy writer conveys their point in particular way that can be understood through anyone who read it because the author of this reserve is well-known enough. This book also makes your own personal vocabulary increase well. Therefore it is easy to understand then can go along with you, both in printed or e-book style are available. We suggest you for having this Computational Methods for Electromagnetic Phenomena: Electrostatics in Solvation, Scattering, and Electron Transport instantly.

Bobby Miller:

Are you kind of active person, only have 10 or even 15 minute in your moment to upgrading your mind skill or thinking skill also analytical thinking? Then you are experiencing problem with the book than can satisfy your small amount of time to read it because pretty much everything time you only find reserve that need more time to be examine. Computational Methods for Electromagnetic Phenomena: Electrostatics in Solvation, Scattering, and Electron Transport can be your answer since it can be read by you who have those short time problems.

Lowell Oliver:

The book untitled Computational Methods for Electromagnetic Phenomena: Electrostatics in Solvation, Scattering, and Electron Transport contain a lot of information on the item. The writer explains her idea with easy way. The language is very straightforward all the people, so do not necessarily worry, you can easy to read this. The book was authored by famous author. The author gives you in the new period of literary works. It is easy to read this book because you can please read on your smart phone, or device, so you can read the book within anywhere and anytime. In a situation you wish to purchase the e-book, you can open their official web-site and order it. Have a nice learn.

Hubert Wooten:

That reserve can make you to feel relax. This book Computational Methods for Electromagnetic Phenomena: Electrostatics in Solvation, Scattering, and Electron Transport was bright colored and of course has pictures on the website. As we know that book Computational Methods for Electromagnetic Phenomena: Electrostatics in Solvation, Scattering, and Electron Transport has many kinds or style. Start from kids until teenagers. For example Naruto or Private eye Conan you can read and believe that you are the character on there. Therefore , not at all of book are generally make you bored, any it can make you feel happy, fun and

loosen up. Try to choose the best book to suit your needs and try to like reading that will.
