Now fully updated and reflecting extensive new research and evidence, *Complementary and Alternative Therapies for Nursing Practice, Fourth Edition* is today's most comprehensive overview of alternative health practices and complementary therapies from a nursing perspective. It begins by explaining philosophical approaches to both Western biomedicine and alternative or complementary medicine, introducing concepts such as energy, breath, spirituality, and healing. Next, it presents diverse systems of health care practice, including the values, attitudes, and beliefs that accompany them. Detailed sections thoroughly discuss botanical and manual healing, mind-body and spiritual approaches, and more. The appendix provides specific information on alternative therapies for many common health problems. This edition contains new evidence throughout, including significantly updated *Considering the Evidence* features presenting eight systematic reviews of randomized control trials, and two new primary research studies. Coverage updates include an expanded discussion of the use of music in therapy, including music-thanatology for palliative care.
