Changes in the healthcare field have threatened the once sacred relationship between patient and physician. While much has been written for physicians and other healthcare providers on the subject of the doctor-patient relationship, information tailored for patients remains lacking. This volume offers practical information to help patients make the most of their interaction with their doctors. Among the topics are finding the right physician, gaining telephone access, ensuring good communication between health care providers, protecting personal information, seeking a second opinion, and using walk-in clinics. In-depth interviews with primary care physicians and medical specialists provide a unique perspective on issues of importance to patients, from pediatrics to geriatrics.
