Gauge/String Duality, Hot QCD and Heavy Ion Collisions Professor Jorge Casalderrey-Solana, Professor Hong Liu, Professor David Mateos, Professor Krishna Rajagopal, Dr Urs Achim Wiedemann

Heavy ion collision experiments recreating the quark-gluon plasma that filled the microseconds-old universe have established that it is a nearly perfect liquid that flows with such minimal dissipation that it cannot be seen as made of particles. String theory provides a powerful toolbox for studying matter with such properties. This book provides a comprehensive introduction to gauge/string duality and its applications to the study of the thermal and transport properties of quark-gluon plasma, the dynamics of how it forms, the hydrodynamics of how it flows, and its response to probes including jets and quarkonium mesons. Calculations are discussed in the context of data from RHIC and LHC and results from finite temperature lattice QCD. The book is an ideal reference for students and researchers in string theory, quantum field theory, quantum many-body physics, heavy ion physics and lattice QCD.

From reader reviews:

Frank Hall:

Spent a free time to be fun activity to accomplish! A lot of people spent their sparetime with their family, or their friends. Usually they doing activity like watching television, about to beach, or picnic inside the park. They actually doing ditto every week. Do you feel it? Do you want to something different to fill your own free time/ holiday? Can be reading a book may be option to fill your totally free time/ holiday. The first thing that you'll ask may be what kinds of reserve that you should read. If you want to consider look for book, may be the book untitled Gauge/String Duality, Hot QCD and Heavy Ion Collisions can be fine book to read. May be it might be best activity to you.

Julie Slocum:

This Gauge/String Duality, Hot QCD and Heavy Ion Collisions is great publication for you because the content and that is full of information for you who else always deal with world and also have to make decision every minute. This kind of book reveal it data accurately using great organize word or we can point out no rambling sentences in it. So if you are read that hurriedly you can have whole data in it. Doesn't mean it only will give you straight forward sentences but challenging core information with splendid delivering sentences. Having Gauge/String Duality, Hot QCD and Heavy Ion Collisions in your hand like having the world in your arm, info in it is not ridiculous just one. We can say that no book that offer you world with ten or fifteen minute right but this publication already do that. So , this really is good reading book. Hey there Mr. and Mrs. stressful do you still doubt that will?

Bertha Wood:

Is it anyone who having spare time then spend it whole day by means of watching television programs or just telling lies on the bed? Do you need something totally new? This Gauge/String Duality, Hot QCD and Heavy Ion Collisions can be the respond to, oh how comes? It's a book you know. You are thus out of date, spending your spare time by reading in this completely new era is common not a nerd activity. So what these textbooks have than the others?

Suzanne Robbins:

Don't be worry if you are afraid that this book may filled the space in your house, you can have it in e-book way, more simple and reachable. This specific Gauge/String Duality, Hot QCD and Heavy Ion Collisions can give you a lot of close friends because by you looking at this one book you have matter that they don't and make an individual more like an interesting person. This kind of book can be one of one step for you to get success. This book offer you information that possibly your friend doesn't learn, by knowing more than different make you to be great individuals. So , why hesitate? We should have Gauge/String Duality, Hot QCD and Heavy Ion Collisions.
