Lens Design, Fourth Edition (Optical Science and Engineering)

Milton Laikin

Lens Design, Fourth Edition (Optical Science and Engineering) Milton Laikin

There is no shortage of lens optimization software on the market to deal with today's complex optical systems for all sorts of custom and standardized applications. But all of these software packages share one critical flaw: you still have to design a starting solution. Continuing the bestselling tradition of the author's previous books, Lens Design, Fourth Edition is still the most complete and reliable guide for detailed design information and procedures for a wide range of optical systems.

Milton Laikin draws on his varied and extensive experience, ranging from innovative cinematographic and special-effects optical systems to infrared and underwater lens systems, to cover a vast range of special-purpose optical systems and their detailed design and analysis. This edition has been updated to replace obsolete glass types and now includes several new designs and sections on stabilized systems, the human eye, spectrographic systems, and diffractive systems. A new CD-ROM accompanies this edition, offering extensive lens prescription data and executable ZEMAX files corresponding to figures in the text.

Filled with sage advice and completely illustrated, Lens Design, Fourth Edition supplies hands-on guidance for the initial design and final optimization for a plethora of commercial, consumer, and specialized optical systems.

From reader reviews:

Elsie Canada:

The book Lens Design, Fourth Edition (Optical Science and Engineering) will bring someone to the new experience of reading the book. The author style to explain the idea is very unique. When you try to find new book to see, this book very appropriate to you. The book Lens Design, Fourth Edition (Optical Science and Engineering) is much recommended to you to see. You can also get the e-book from your official web site, so you can more easily to read the book.

Gary Farrell:

People live in this new morning of lifestyle always aim to and must have the time or they will get great deal of stress from both way of life and work. So , whenever we ask do people have spare time, we will say absolutely indeed. People is human not really a huge robot. Then we question again, what kind of activity are there when the spare time coming to you actually of course your answer may unlimited right. Then do you ever try this one, reading publications. It can be your alternative in spending your spare time, often the book you have read is Lens Design, Fourth Edition (Optical Science and Engineering).

Stephen Wilson:

In this age globalization it is important to someone to get information. The information will make professionals understand the condition of the world. The health of the world makes the information easier to share. You can find a lot of personal references to get information example: internet, paper, book, and soon. You will observe that now, a lot of publisher which print many kinds of book. The book that recommended for your requirements is Lens Design, Fourth Edition (Optical Science and Engineering) this guide consist a lot of the information from the condition of this world now. This book was represented so why is the world has grown up. The words styles that writer require to explain it is easy to understand. Often the writer made some analysis when he makes this book. That is why this book appropriate all of you.

Rhonda Rudder:

As a scholar exactly feel bored to help reading. If their teacher inquired them to go to the library or make summary for some reserve, they are complained. Just minor students that has reading's heart or real their leisure activity. They just do what the instructor want, like asked to go to the library. They go to presently there but nothing reading seriously. Any students feel that reading is not important, boring and also can't see colorful photos on there. Yeah, it is to become complicated. Book is very important for you personally. As we know that on this age, many ways to get whatever we want. Likewise word says, many ways to reach Chinese's country. Therefore , this Lens Design, Fourth Edition (Optical Science and Engineering) can make you truly feel more interested to read.
