## Responding to Drug Misuse: Research and Policy Priorities in Health and Social Care

*Responding to Drug Misuse* provides a unique insight into the current shape of the drugs treatment system in England.

Reporting findings from research linked to the government's ten year drugs strategy *Tackling Drugs to Build a Better Britain*, the book places these in the context of policy, practice, and service development. It goes on to discuss the implications of these findings for the government's new strategy *Drugs: Protecting Families and Communities*. Throughout the book contributors reflect on current debates on drug strategies and social policy and consider the relevance of the findings for policy and practice. Topics discussed include:

- recent trends in drug policy and how these link to crime
- responses of dedicated drug treatment services
- service users' perceptions and suggestions for improvement
- the impact of drug misuse on children, families and communities.

This timely addition to the literature on drug misuse will be essential for substance use practitioners, including social workers, psychiatrists, psychologists and nurses. It will also supply helpful guidance for health and social care commissioners and policy providers.
