Artificial Reefs in Fisheries Management (CRC Marine Biology Series)

Artificial Reefs in Fisheries Management (CRC Marine Biology Series)

While artificial reefs may have much to offer, they remain an anecdote in the greater scheme of fisheries management, primarily due to the lack of data specific to validating their use. Based on papers presented at the 9th Conference on Artificial Reefs and Artificial Habitats (CARAH) and also including original articles written for this reference, **Artificial Reefs in Fisheries Management** brings to the forefront the current state of knowledge regarding artificial reefs and their pragmatic application to furthering fisheries sustainability. It presents a timely compilation of research to increase options for the implementation of artificial reefs for fishery and natural resource managers.

Artificial Reefs in Fisheries Management offers an inclusive and encompassing description of the field by chapter authors drawn from diverse geographical areas. This approach gives readers the broadest of perspectives and reflects regional interests and experience with artificial reefs in different parts of the world.

Coming at an opportune time in the field of artificial reefs, **Artificial Reefs in Fisheries Management** aids researchers and natural resource managers more carefully consider the special features of artificial reefs in their application to resolving fisheries management problems. This book is an important step toward improving the prescribed use of artificial reefs as a viable option in many of the world's fisheries in the quest to make more of the world's fisheries sustainable.
