Contemporary Artificial Intelligence

Richard E. Neapolitan, Xia Jiang

Contemporary Artificial Intelligence Richard E. Neapolitan, Xia Jiang

The notion of artificial intelligence (AI) often sparks thoughts of characters from science fiction, such as the Terminator and HAL 9000. While these two artificial entities do not exist, the algorithms of AI have been able to address many real issues, from performing medical diagnoses to navigating difficult terrain to monitoring possible failures of spacecrafts. Exploring these algorithms and applications, **Contemporary Artificial Intelligence** presents strong AI methods and algorithms for solving challenging problems involving systems that behave intelligently in specialized domains such as medical and software diagnostics, financial decision making, speech and text recognition, genetic analysis, and more.

One of the first AI texts accessible to students, the book focuses on the most useful problem-solving strategies that have emerged from AI. In a student-friendly way, the authors cover logic-based methods; probability-based methods; emergent intelligence, including evolutionary computation and swarm intelligence; data-derived logical and probabilistic learning models; and natural language understanding. Through reading this book, students discover the importance of AI techniques in computer science.

From reader reviews:

Anna Brooks:

The particular book Contemporary Artificial Intelligence will bring that you the new experience of reading a book. The author style to elucidate the idea is very unique. In the event you try to find new book to see, this book very appropriate to you. The book Contemporary Artificial Intelligence is much recommended to you to read. You can also get the e-book from your official web site, so you can easier to read the book.

Judith Cole:

Is it anyone who having spare time and then spend it whole day by watching television programs or just lying down on the bed? Do you need something new? This Contemporary Artificial Intelligence can be the response, oh how comes? A fresh book you know. You are thus out of date, spending your spare time by reading in this new era is common not a nerd activity. So what these books have than the others?

Jeffrey Gorski:

Do you like reading a guide? Confuse to looking for your favorite book? Or your book had been rare? Why so many query for the book? But just about any people feel that they enjoy regarding reading. Some people likes reading through, not only science book but also novel and Contemporary Artificial Intelligence as well as others sources were given understanding for you. After you know how the truly amazing a book, you feel need to read more and more. Science reserve was created for teacher as well as students especially. Those publications are helping them to put their knowledge. In other case, beside science reserve, any other book likes Contemporary Artificial Intelligence to make your spare time a lot more colorful. Many types of book like this.

Matthew Simons:

As a student exactly feel bored in order to reading. If their teacher questioned them to go to the library or to make summary for some reserve, they are complained. Just small students that has reading's spirit or real their pastime. They just do what the instructor want, like asked to go to the library. They go to presently there but nothing reading critically. Any students feel that looking at is not important, boring and also can't see colorful pictures on there. Yeah, it is to be complicated. Book is very important for you. As we know that on this period, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's country. So , this Contemporary Artificial Intelligence can make you truly feel more interested to read.
