Manual of Peritoneal Dialysis: Practical Procedures for Medical and Nursing Staff G.A. Coles

Peritoneal dialysis (PD) is in widespread use for the treatment of acute and chronic renal failure. A considerable amount of knowledge about the various procedures and problems associated with this form of treatment has accumulated over recent years, particularly since the introduction of continuous ambulatory peritoneal dialysis (CAPD). However to date the information regarding the more technical or practical aspects of PD has been largely scattered in various books and journals. There appears to be no straightforward text concerned with these points suitable for recommending to junior doctors or nurses dealing with patients receiving this therapy. Though in-house-training is of considerable value it takes time and I have noticed that on a number of occasions in our own unit, technical problems with PD have not been dealt with quickly because of lack of knowledge in the staff on duty. There thus appeared to me to be a need for a short book giving firm advice on how to perform the various procedures and how to deal with problems as they arose. This manual is an attempt to fulfil that aim. Initially it was tried and tested on the renal unit in the Cardiff Royal Infirmary for 3 years. Prior to publishing it has been extensively revised and updated.

From reader reviews:

Sheryl Vaughan:

Do you have favorite book? If you have, what is your favorite's book? Guide is very important thing for us to understand everything in the world. Each guide has different aim or goal; it means that publication has different type. Some people really feel enjoy to spend their a chance to read a book. They may be reading whatever they consider because their hobby is usually reading a book. What about the person who don't like looking at a book? Sometime, individual feel need book after they found difficult problem or exercise. Well, probably you'll have this Manual of Peritoneal Dialysis: Practical Procedures for Medical and Nursing Staff.

Brenda Cornell:

What do you think of book? It is just for students because they are still students or the item for all people in the world, what best subject for that? Just simply you can be answered for that problem above. Every person has different personality and hobby for each and every other. Don't to be pressured someone or something that they don't want do that. You must know how great and important the book Manual of Peritoneal Dialysis: Practical Procedures for Medical and Nursing Staff. All type of book would you see on many solutions. You can look for the internet resources or other social media.

Sean Rusin:

People live in this new day time of lifestyle always aim to and must have the extra time or they will get lot of stress from both daily life and work. So , once we ask do people have extra time, we will say absolutely indeed. People is human not only a robot. Then we request again, what kind of activity have you got when the spare time coming to you actually of course your answer may unlimited right. Then ever try this one, reading books. It can be your alternative inside spending your spare time, the actual book you have read is actually Manual of Peritoneal Dialysis: Practical Procedures for Medical and Nursing Staff.

Sandra Easley:

What is your hobby? Have you heard in which question when you got students? We believe that that question was given by teacher to the students. Many kinds of hobby, All people has different hobby. And you also know that little person including reading or as studying become their hobby. You should know that reading is very important in addition to book as to be the thing. Book is important thing to provide you knowledge, except your personal teacher or lecturer. You get good news or update with regards to something by book. Different categories of books that can you decide to try be your object. One of them is niagra Manual of Peritoneal Dialysis: Practical Procedures for Medical and Nursing Staff.
