## Research Explorations in Adult Attachment (American University Studies Series VIII, Psychology)

Exploratory studies show how the theory of socioemotional bonds (attachment) casts new light on seemingly disparate adult disturbances often recognized but not well understood by clinicians. These include father-daughter incest, battered women, child abusing mothers, bereaved mates, prostitutes, and abused and neglected adolescents.

Findings provide insights that readily make intuitive sense to clinicians and all that work synergistically with family systems object-relations, and psychodynamic orientations.
