Updated and supplemented with a brand-new CD-ROM, this manual prepares dental school applicants across the United States and Canada to pass the required admissions test. The book opens with an overview of the DAT that includes test-taking advice, followed by a description of dental education and the practice of dentistry. A review of all DAT test topics is presented. They include general surveys of biology, chemistry, and organic chemistry, as well as testing for perceptual ability, reading comprehension, and quantitative reasoning. Two full-length model DATs complete this manual and come with all questions answered and explained. The DAT is a computerized test, and this book's bonus CD-ROM presents two additional model DATs that simulate actual test-taking conditions. They come with automatic scoring.
