For courses on C# programming found in departments of Computer Science, CIS, MIS, IT, Business, Engineering and Continuing Education. An exciting addition to the How to Program series, C# How to Program provides a comprehensive introduction to Microsoft's new object-oriented language. C# builds on the skills already mastered by countless C++ and Java programmers, enabling them to create powerful Web applications and components-ranging from XML-based Web services on Microsoft's .NETaA A platform to middle-tier business objects and system-level applications. C# How to Program gives students the strong foundation in introductory and intermediate programming principles they'll need in industry. Mastering C# will allow them to create complex systems-using fewer lines of code and reducing the chance for error. The end result is faster development at a decreased cost-and optimum adaptability that makes it easy to keep up with the evolving Web.
